Federal Building Controls Inventory Reconciliation

Cybersecurity Evidence & Documentation Support

CAGE	UEI	PRIMARY NAICS	ADDITIONAL NAICS
22FA1	CV4EWDJPUMQ1	541519 Other Computer Related Services	541512, 541513

For federal/military construction primes, HVAC/building automation controls integrators, and facility-related control system (FRCS) cyber contractors.

Conflicting equipment schedules, drawings and device lists slow reviews. Missing evidence leaves open questions at turnover. TMA reconciles supplied records into traceable deliverables, with discrepancies and missing information clearly flagged.

WHAT YOU RECEIVE

01 **Reconciled building-control asset register**
Normalize records; flag duplicates, omissions and conflicts.

02 **Discrepancy / open-item log**
Track conflicting records, missing data, owners and review status.

03 **Source / evidence index**
Link register entries to supplied sources; flag evidence gaps.

04 **Revision-controlled workbook**
Capture changes, reviewer decisions and revision history.

05 **Reviewer-ready turnover package**
Assemble the register, log, index and workbook for handoff.

WHY TMA

HUBZone-certified

Small business | Banning, CA

Founder qualifications

CompTIA Security+
ISC2 Certified in Cybersecurity (CC)

Defined engagement

Agreed inputs, review roles and acceptance criteria before work begins.

RECORDS-BASED SCOPE

Based on supplied records and authorized exports. A customer-qualified technical reviewer verifies installed conditions and makes cybersecurity and technical compliance determinations. No live OT testing, scanning, configuration changes or commissioning.

Discuss a Building Controls Inventory Reconciliation Pilot

Illustrative scope: one subsystem, up to 50 supplied device records and up to 3 source sets.

Subject to agreed scope, schedule, price and acceptance criteria. No guaranteed outcomes.
